PROFESSIONAL SUMMARY

Pursuing final year of B.TECH in Electronics and Computers. Frontend Web Developer with a solid foundation in HTML, CSS, Django, and Data Structures Algorithms. Passionate about building responsive, user-friendly interfaces and writing clean, efficient code. Quick learner and team player, eager to contribute to impactful web projects. Strong analytical and problem-solving skills with the ability to diagnose and resolve system issues efficiently. Keen interest in learning emerging technologies like cloud services.

EDUCATION

B.TECH in Electronics and Computer Engineering	2021 - 2025
SRM Institute of Science and Technology, Ramapuram	CGPA : 8.68
Higher Secondary, Grade XII	2020 - 2021
The Ashok Leyland School, Hosur	Percentage: 78
Higher Secondary, Grade X	2018 - 2019
The Ashok Leyland School, Hosur	Percentage: 79

SKILLS

Technical Skills	Python, HTML, CSS, Frontend framework, Django, DSA
Soft Skills	Communication Skills, Interpersonal Skills, Initiative, Organized, Emotional Intelligence
Tools	Wireshark, VS code, GitHub
Others	Figma, Prompt engineering, Content writing

PROJECTS

To-Do List Web App: Build a simple to-do list web app using Django for backend logic and HTML/CSS for frontend. Users can add, edit, and delete tasks. You'll get hands-on with Django models, views, and forms while improving your UI skills.

Search Algorithm Visualizer (DSA): Create a visual tool using HTML/CSS and JavaScript (or just HTML/CSS for layout and Django to host) to visualize basic search algorithms like linear and binary search. Helps reinforce your understanding of DSA with a frontend twist.

Integrated Automotive Safety System: Enhances vehicle and driver safety, particularly in commercial fleets, by addressing risks like impaired driving, unauthorized access, and driver fatigue. It combines advanced technologies such as alcohol detection, facial recognition for driver authentication, and drowsiness detection to proactively prevent accidents and protect all occupants.

Key Tool: Arduino, Micro python

Contact Form with Email Integration: Design a contact form that collects user input and sends it to an email using Django's email module. Great for understanding forms, validation, and basic backend-to-frontend communication.

IOT for Visually Challenged: This aids visually challenged people to navigate their surroundings by alerting them of obstacles around them using ultrasonic sensors and vibrators. The ultrasonic sensors detect any obstacle in the path by which the visually challenged goes by and the vibrators navigate them by avoiding the obstacles, giving them the appropriate vibrations accordingly.

Key Tools: Arduino Uno, Basics of IOT implementation.

CERTIFICATIONS

- Web Development workshop - SRM IST - Ramapuram
- Data Science - NPTEL, IIT Madras
- Python programming - SkillVertex
- Robotics Workshop - SRM IST - Ramapuram
- Course on PSpice - Livewire

ACHIEVEMENTS

Winner in Camogenics 2022 - SRM IST

POSITIONS OF RESPONSIBILITY

Student Coordinator for ELEXCA'24

Ensured the smooth operation of technical events, as student coordinator of the ELEXCA'24 symposium conducted by the ECE department at SRM Institute of Science and Technology - Ramapuram .

SEMINARS / TRAININGS / WORKSHOPS

Internet Of Things using smart devices:

During the one week training period at the workshop conducted by the TVS training we worked on interfacing several different sensors with Arduino UNO and also developed A walking stick for blind using IOT that consists of ultrasonic sensors and vibration motors.

Institute: TVS Training and Service

Key Skills: Internet of Things, Arduino UNO, Sensors Activation, Interfacing.

AI with python:

Participated in "Artificial Intelligence with Python" training program conducted by IIT Guwahati for 2 months .During the training period I gained exceptional knowledge on AI/ML concepts , also got good exposure on the fundamentals of Microsoft Azure.

Institute: IIT Guwahati

Key Skills: Python, Artificial Intelligence, Machine Learning, Microsoft Azure
